

Class 3: Value Systems

logistics

TA office hours start today
See Coursekit for supplementary materials
Assignment 1 posted later this week

outline

1. great technology companies
2. valuation
3. durability
4. capturing value
5. the ideology of competition

value

the challenge of 0 to 1

the challenge of 0 to 1

the challenge of 0 to 1

“what valuable company is nobody building?”

great companies

great companies

create value

great companies

create value

are durable

great companies

create value

are durable

capture value

outline

1. great technology companies
2. valuation
3. durability
4. capturing value
5. the ideology of competition

valuation methods

valuation methods

multiples & comparables

valuation methods

multiples & comparables

P/E and PEG ratios

valuation methods

multiples & comparables

P/E and PEG ratios

discounted cash flows

multiples & comparables

multiples & comparables

Incubator exit?
standard \$10M cap

multiples & comparables

Incubator exit?
standard \$10M cap

$$\frac{(\$1M) \cdot (n_{\text{engineers}}) - (\$500K) \cdot (n_{\text{MBAs}})}{\text{pre-money valuation}}$$

multiples & comparables

Incubator exit?
standard \$10M cap

$$\frac{(\$1M) \cdot (n_{\text{engineers}}) - (\$500K) \cdot (n_{\text{MBAs}})}{\text{pre-money valuation}}$$

$(\$X) \cdot (\text{monthly page views})$
 $(\$Y) \cdot (\text{active users})$

multiples & comparables

Incubator exit?
standard \$10M cap

$$\frac{(\$1M) \cdot (n_{\text{engineers}}) - (\$500K) \cdot (n_{\text{MBAs}})}{\text{pre-money valuation}}$$

(\$X) * (monthly page views)

(\$Y) * (active users)

Revenue multiple

P/E and PEG ratios

P/E and PEG ratios

$$\text{P/E ratio} = \frac{\text{Market value (per share)}}{\text{Earnings (per share)}}$$

P/E and PEG ratios

$$\text{P/E ratio} = \frac{\text{Market value (per share)}}{\text{Earnings (per share)}}$$

↓
adjust for growth
↓

P/E and PEG ratios

$$\text{P/E ratio} = \frac{\text{Market value (per share)}}{\text{Earnings (per share)}}$$

adjust for growth

$$\text{PEG ratio} = \frac{\text{Market value / Earnings}}{\text{Annual earnings growth}}$$

P/E and PEG ratios

$$\text{P/E ratio} = \frac{\text{Market value (per share)}}{\text{Earnings (per share)}}$$

adjust for growth

$$\text{PEG ratio} = \frac{\text{Market value / Earnings}}{\text{Annual earnings growth}}$$

Lower PEG ratio: cheaper

Higher PEG ratio: more expensive

steady cash flows

Free cash flows

the time value of money

the time value of money

$r = \text{discount rate}$

the time value of money

$r = \text{discount rate}$
